

Enstso JANVIER

IT Analyst Engineer

✉ enstso@outlook.fr ☎ 0695024332 📍 Paris, France 🌐 Enstso.J 📧 Enstso 🌐 Soski 🌐 enstso.com

SKILLS

Languages and Frameworks : C#, JavaScript, TypeScript, NodeJs, C, Go, Python, Shell, PHP, SQL, HTML, CSS, Tailwind, Bootstrap, React, Angular, Remix, VueJs, AdonisJs, Symfony, Express, CodeIgniter, NestJs, .NET, Laravel, JQuery, GraphQL, MongoDB.
DevOps and Cloud : Docker, Kubernetes, Azure, AWS, IBM Cloud, Ansible, Terraform, CI/CD, GitLab, GitHub.
Cybersecurity : Cyber Kill Chain, Audit, Purple knight, Top 10 OWASP, exploits network services, HID, cryptography, Google Dorking.
Systems : RabbitMq, Kafka, Redis, Nginx, Apache, Linux, Windows and Mac OS / Hyper-V, Vmware.
Others : Git, n8n, Notion, Slack, K6, UML, FinOps, Excel, Selenium.

PROFESSIONAL EXPERIENCE

IT Analyst Engineer, Freelance 01/2025 – Present
Freelance

- Development of cross-platform applications using **React Native (Expo)** and **NestJS**, in the dating and personal services sectors (ongoing projects).
- Requirement analysis with clients: translation of business needs into technical specifications and **UML** diagrams, ensuring alignment and clarity for both stakeholders and development teams.
- Feature ideation and validation, including active participation in contract drafting and advising clients on **infrastructure** strategy and technology choices.
- **Cloud** architecture design and deployment of scalable **infrastructures** with hosted services, focused on performance, reliability, and cost optimization.
- Implementation of **complex algorithms** adapted to business logic, ensuring scalability to handle millions of users.
- **Agile/Scrum project management**: backlog structuring, task breakdown, and coordination with teams for iterative delivery.
- **Cost analysis** and long-term **scalability strategies**, aligning technical solutions with business goals.
- **Consulting on blockchain-oriented cloud architectures**: definition of strategies, resource allocation, and integration of blockchain into scalable **cloud infrastructures**.
- Development of **cluster federation management features (Remix & Adonis)**, with orchestration, monitoring, and **infrastructure/user management tools** to guarantee high availability and resilience.
- **Active involvement in strategic decision-making**, providing expertise on **cloud-native ecosystems** and **decentralized technologies**.

IT Analyst Engineer, Apprenticeship 09/2024 – present
BNP Paribas Asset Management Nanterre, France

- Development of an **Angular** and **.NET** application, ensuring the implementation of scalable and efficient features to enhance cloud resource management and guarantee application reliability.
- Implementation of unit tests on both the **Angular** frontend (using **Jasmine/Karma**) and the **.NET** backend (with **NUnit**), significantly improving stability and reducing regressions.
- Set up a **PostgreSQL** script using a cursor to restore coherence across records, ensuring data consistency and compliance with **ACID** principles.
- Optimization of database structures by improving table design and implementing migration scripts to correct existing data issues, ultimately enhancing query performance and system reliability.
- Creation of **UML** diagrams to facilitate the understanding of features, as well as active involvement in decision-making processes through requirement analysis and validation.
- Management of a **K8S** cluster by adapting strategies according to workload needs and server specifications, ensuring optimal scalability, availability, and performance.
- Data analysis from **Excel** files to detect inconsistencies and define a structured fix strategy, ensuring data integrity.
- Advanced training in cloud technologies.

Full Stack Developer, Apprenticeship 09/2023 – 09/2024
Dataventure Group EDG Levallois-Perret, France

- Development of landing pages for client campaigns across various sectors (automotive, food, etc.) using **CodeIgniter**.
- Creation of lead management tools in **Symfony**, development of lead manipulation scripts in **Python**, as well as APIs in **Node.js** and **PHP**.
- Front-end development using **React** and **Vue.js**.
- Project dockerization, implementation of webhooks for data delivery automation with **N8N**, and understanding of client API documentation.
- **Ubiquiti** layer three switch configuration.

EDUCATION

Master Dev Manager Full Stack 09/2024 – 09/2026
Efrei 🌐 Villejuif, France

Bachelor Cybersecurity 09/2023 – 08/2024
ESGI, École Supérieure de Génie 🌐 Paris, France

BTS SIO SLAM 09/2021 – 07/2023
Lycée Jean Jacques Rousseau Montmorency, France

CERTIFICATIONS

MOOC ANSSI 🌐 100% **RootMe /Ruashikku** 🌐 19 challenges **Ethical Hacking Linkedin Learning** **CCNA**
